

Mist Code Ltd

Graduate Flutter Developer

About the role

We're Looking for passionate graduate developers who enjoy taking on a challenge to join our mobile application development team.

The developer's role is to define, develop, test, and maintain software applications to meet the high standard outcomes. This includes writing code, testing, and analysing software programs and applications. As a Graduate Developer, you will work closely with the leading developer and senior developers.

About you

- Flutter and Dart are essentials
- You must have legal working permission in New Zealand.
- You must have a university undergraduate/Postgraduate degree (in Information Technology, Computer Science, Software Engineering and related subjects).
- Your GPA should be a minimum of 65%
- You must have a proven passion for Information Technology and be able to demonstrate this!
- An excellent 'team player' attitude
- Strong attention to detail
- Excellent ability to communicate both written and verbally
- Essential-enthusiasm and a willingness to learn/adapt/create
- Be a problem solver - uses initiative and critical thinking
- Enjoy working in a star-up environment
- Be available to start no later than 1st February 2021 for full-time employment.

How to apply

Please email your **CV** and **transcript** to info@mistcode.com , we'll make contact from there!

Please include answers to the following questions in your application.

1. What is your current visa status? Resident or citizen visa? Working visa with an expiration date?
2. How have you been using Flutter and Dart? Any Flutter or Dart projects you involved?
3. Do you have any experience in developing mobile apps independently?

We look forward to hearing from you!
